

MGO Automatic Change-over Unit

Brand
New

The MGO automatic change-over unit enables to change over the fuel from HFO to MGO by pressing only one button on the control panel. Be free from all the jobs needed when you enter Emission Control Areas (ECA's).

IMO Worldmap for ECA's (Emission Control Areas)

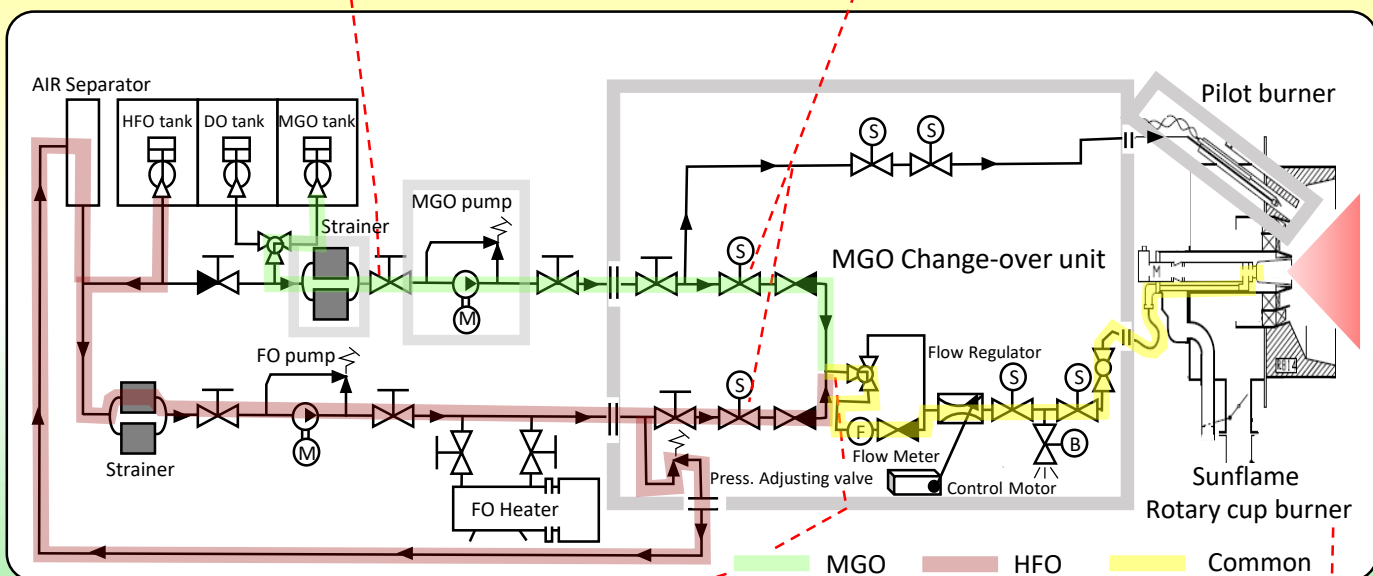

No Extra Piping for MGO No MGO Cooler

Using existing one pass pilot fuel line

Automatic Safety Change-over

By two solenoid valves

Saving Expensive MGO

By quick change-over just before the burner

Best Burner for Extreme Fuels

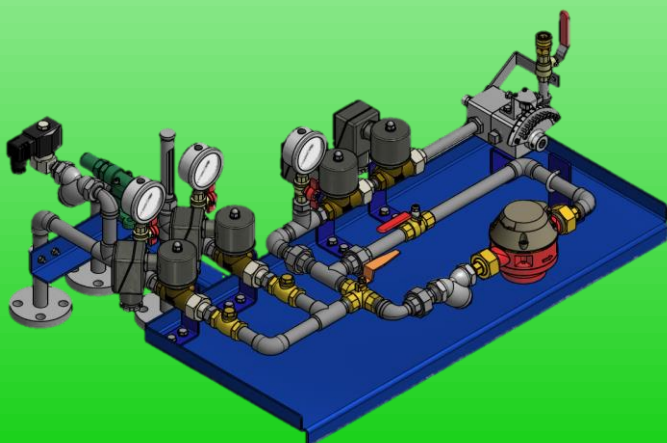

MGO

1.5cSt at
40 deg. C

**Rotary
Cup
Burner**

HFO

1000cSt at
50 deg. C

Sunflame Rotary cup burners can cope with wide range of fuel viscosity from 1.5cSt up to 1000cSt.

This means MGO and HFO can be burned with the same standard by Sunflame rotary cup burner.
